

I find the XM weather and traffic offerings to be better, more complete, and more available than other options. Having to commute 40 miles each way in Northern Virginia, I need current complete traffic and weather information. I tried WTOP on the "eights" but this did not meet my needs and often omitted the routes I follow.

I am confused by why this is an issue at all. I pay for this XM service, so why should restricting this service be a question.

XM is a really good product. Good music, varied programs, outstanding quality and no commercials. I send them an EMAIL and they respond !!! Try that with the Redskins Football Network and the appalling treatment of Sonny, Sam and Frank. You call these folks and are told to stuff it because a corporate decision has been made.

Please leave XM alone and tell the Redskins Football Network to bring back Frank and you'll be doing your job for consumers.
